*Trying to figure out what's the best way to optimize your budget while meeting your equipment needs?*

*Put our experience to work for you!*

Trucks, buses, technology, infrastructure, phone systems, software, projects, roofs, HVAC, grounds/maintenance equipment, laptops and Chromebooks make up only a partial list of items that you may have to purchase next year. Cash purchase, lease purchase, budget impact and cash flow: what is the most cost effective way to acquire equipment and projects that are essential to meet the needs of your school district or governmental entity?

All tax-exempt financing is not alike. There is a world of difference between issuing a bond and bidding a lease purchase. We offer over twenty-five years of structuring and bidding tax-exempt lease purchase transactions for our governmental clients. We have specialized in lease purchase financing and know what and how banks look at a potential lease purchase transaction. A brief phone conversation may give you some insight in financing alternatives that may save you thousands of dollars.

For those of you who have worked with us over the years, please note the new address and contact information. We look forward to being of service and working with you.
